## 1. Windows 10

To update the USB Vendor Class driver, first connect the printer to a USB port on your computer, and then turn the printer on. Then carry out the following steps.

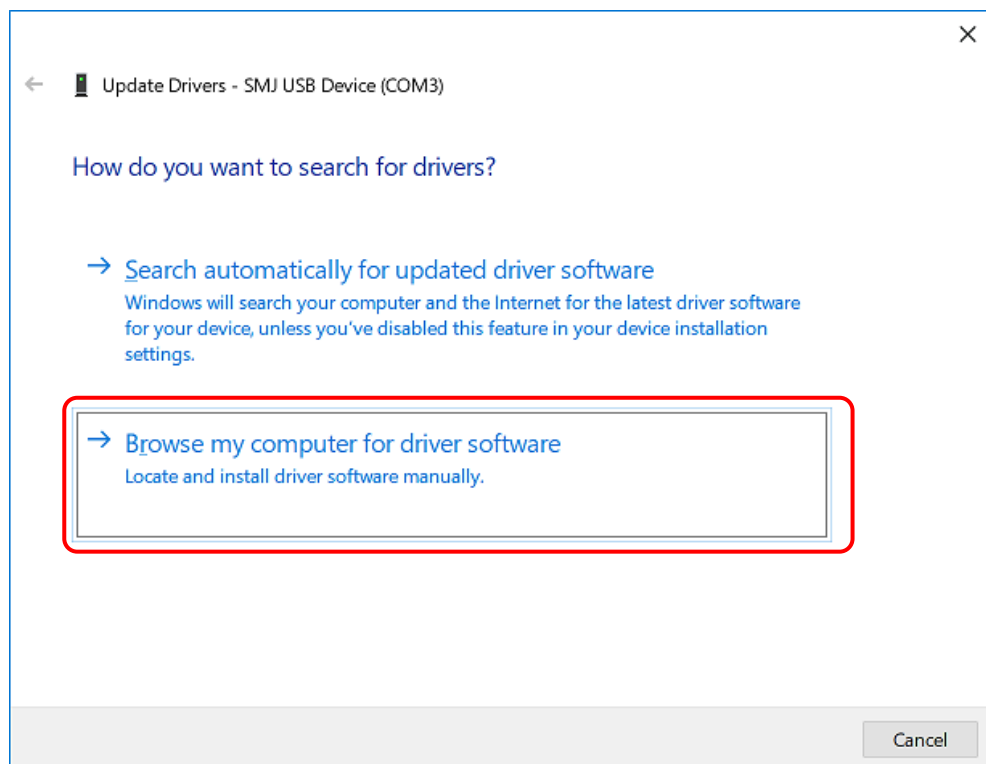

- ① Save the updated driver into any desired location on your computer's hard disk.
- ② Right-click the , and click **Device Manager**.

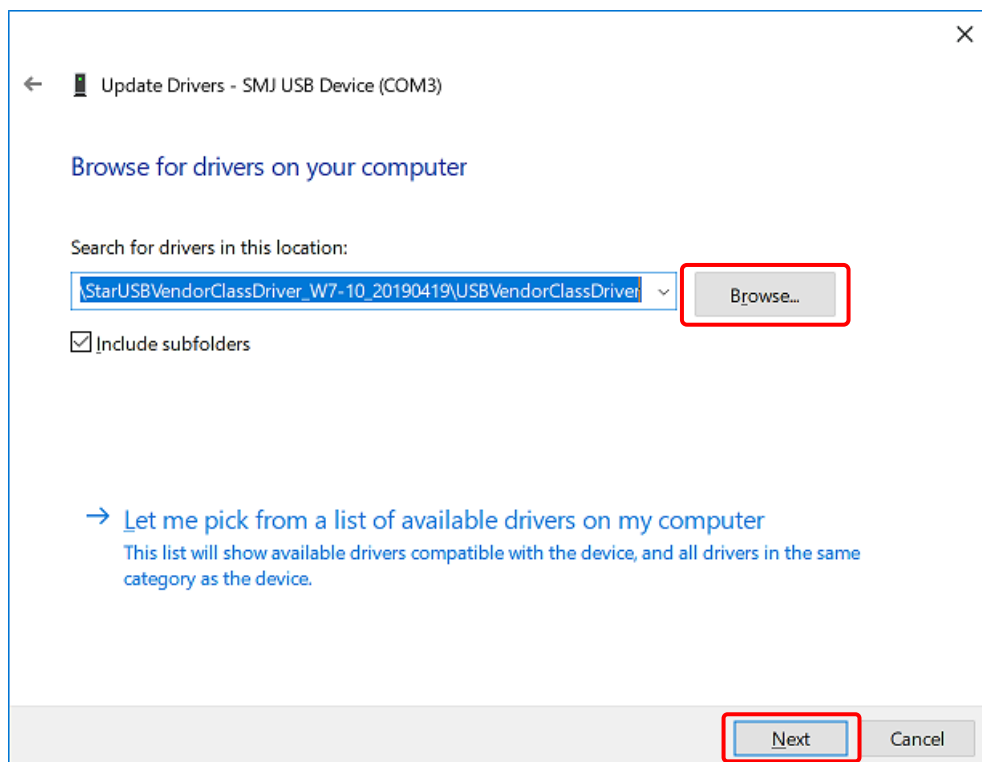

- ③ Open **Ports (COM & LPT)**, right-click **SMJ USB Device**, and select **Update driver**.

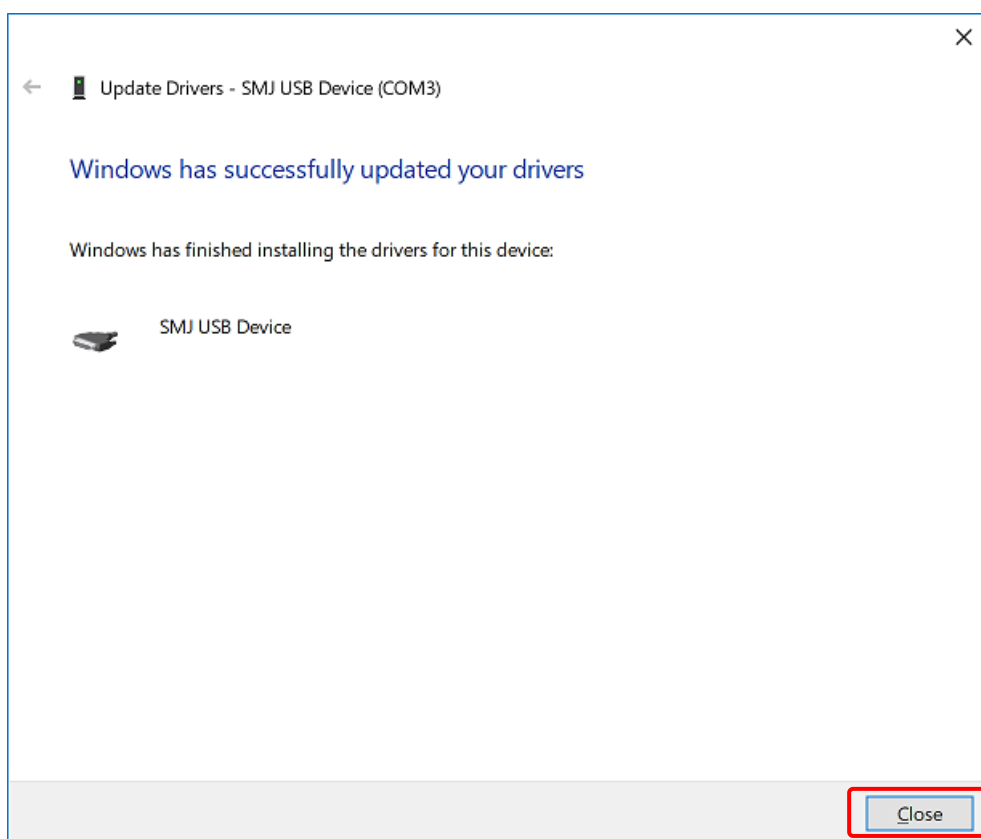

- ④ When asked how to search for the software, select **Browse my computer for driver software**.

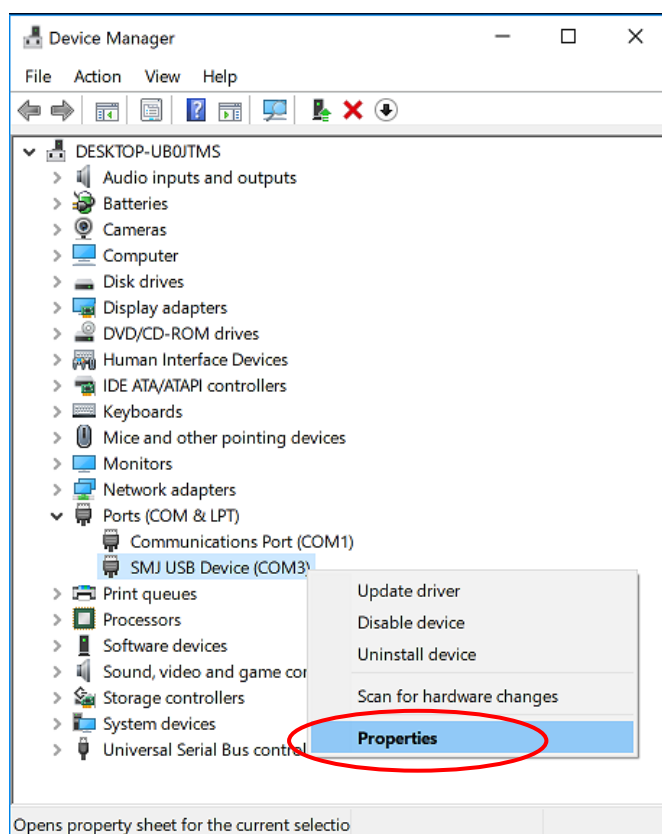

- ⑤ Click **Browse**, specify the location into which you saved the updated driver, and click **Next** to start the install.

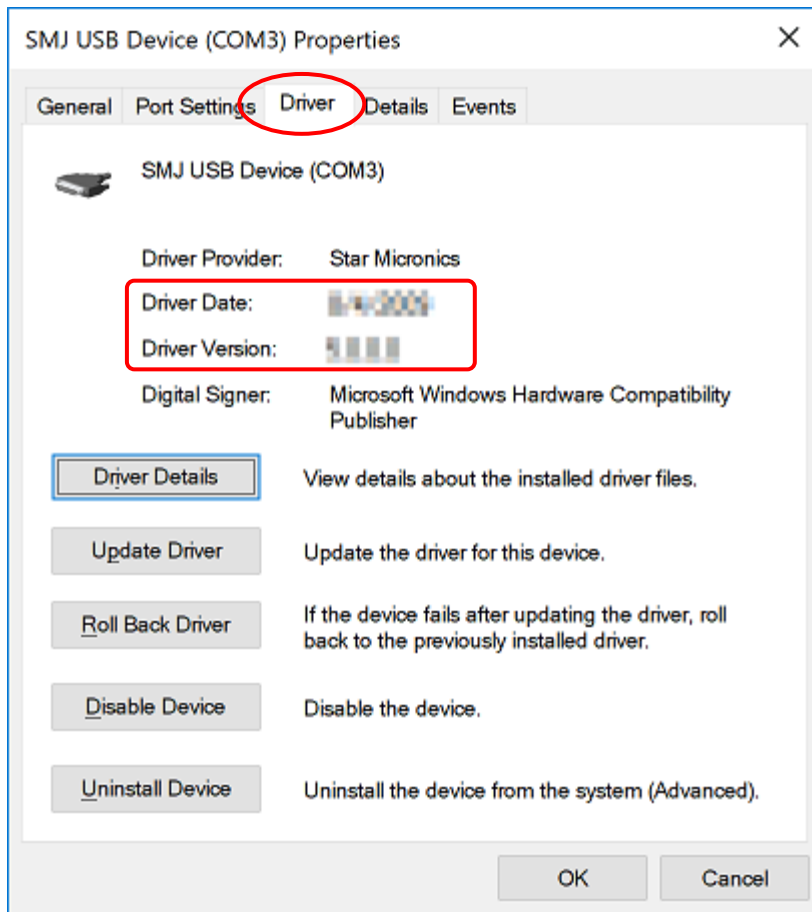

- ⑥ When installation is completed, you will see the message **Windows has successfully updated your drivers**. Click **Close** to close the window.

- ⑦ Open **Ports (COM & LPT)**, right-click **SMJ USB Device**, and select **Properties**.

- ⑧ Select the **Driver** tab, and confirm that the date and the version indicated on the screen matches the version of the updated driver.

**Important:** Note down the date and the version number of the updated driver before installing it. After completing the installation, confirm that the date and the version number under the **Driver** tab matches the date and the version number that you wrote down. If the numbers match, the update was successful.

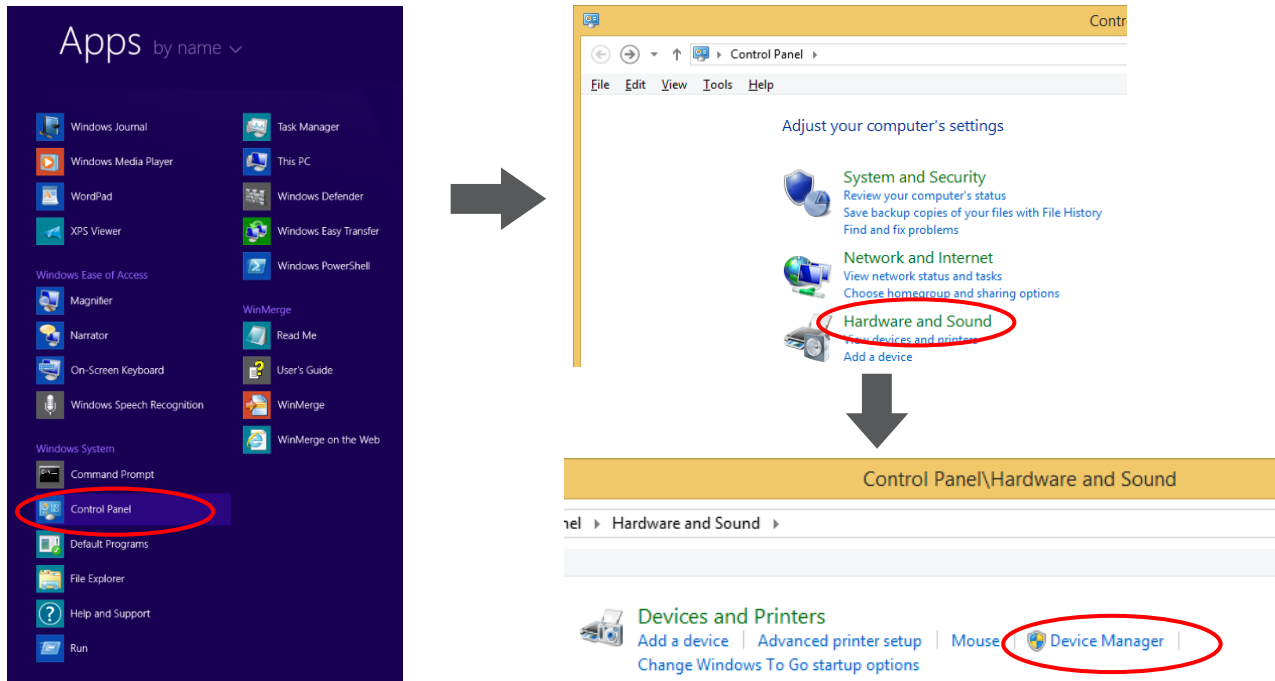

- ⑨ Turn the printer power off and then on again.

Updating of the USB Vendor Class driver is now completed.

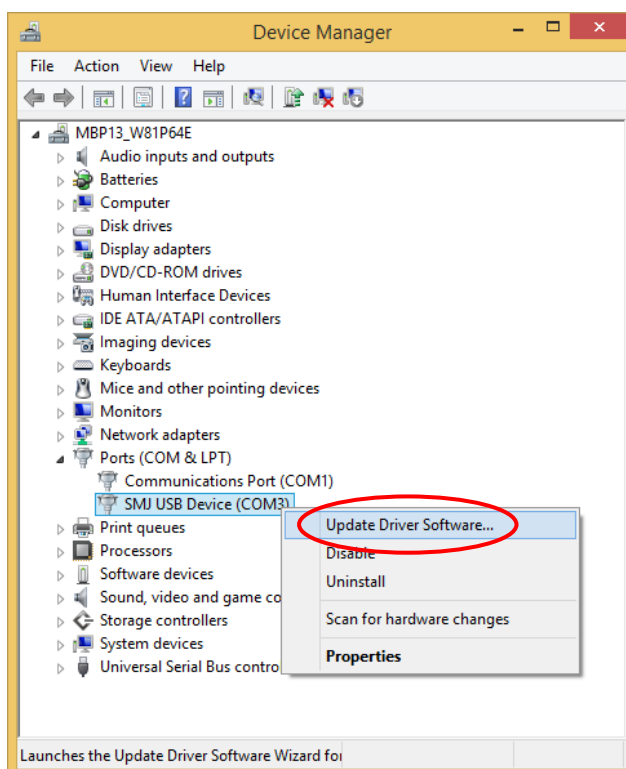

## 2. Windows 8.1 / 8

To update the USB Vendor Class driver, first connect the printer to a USB port on your computer, and then turn the printer on. Then carry out the following steps.

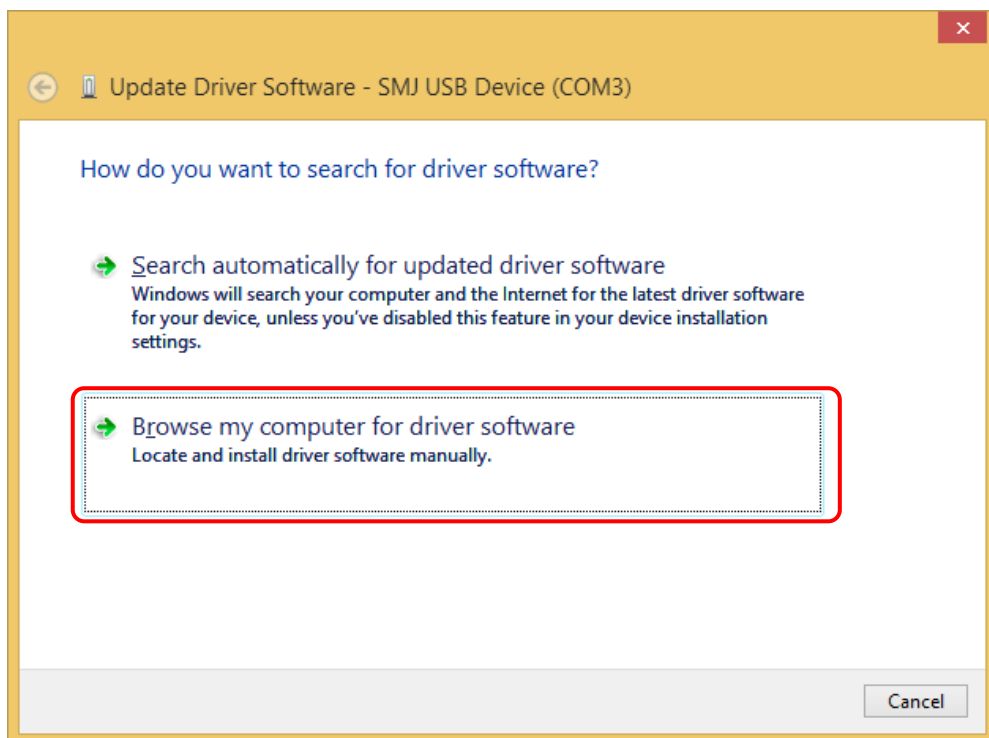

- ① Save the updated driver into any desired location on your computer's hard disk.
